-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Applicant's election of Species I in the reply filed on June 30, 2006 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

No claims have been withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on June 30, 2006.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-8, 11, and 13-27 are rejected under 35 U.S.C. 102(e) as being anticipated by Huppert et al Patent Pub. 2005/0065611 A1.

Huppert et al discloses an intervertebral disc (1) comprising a first and second components (111 and 112) having a first and second bearing surfaces (10 & 10'), a first and second laterally extending flanges (2) and a first and second articular surfaces (see Figs. 2a, 2b & 3).

Regarding claim 3, see Fig. 3.

Regarding claim 2, the first flange is capable of being offset relative to the second flange if the bearing (13) (see Fig. 3) slides to the right and the rest of the plate 111 slides to the left.

Regarding claim 8, see Fig. 1, element 24 and 23.

Regarding claim 11, see element 25 in Fig. 1.

Regarding claim 13, see notches between element 113.

Regarding claim 14, see Fig. 3, element 13.

Regarding claims 15-17, see Fig. 3.

Regarding the method claims see Figs. 3-4 and paragraph 22.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 9, 10 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Huppert et al US Pat. Pub. 2005/0065611 A1 in view of Coates et al US Patent 6,899,735 B2.

Huppert et al discloses the invention substantially as claimed. However, Huppert et al does not disclose a coating with a bone-growth promoting substance and an implant made of a cobalt-chrome-molybdenum metallic alloy.

Coates et al teaches an intervertebral implant made of cobalt-chrome-molybdenum metallic alloy and having bone-growth substances for the purpose of promoting the growth of bone tissue and have a biocompatible implant (see col. 4, lines 1-16).

Art Unit: 3738

It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the material property and add a coating of bone-growth promoting substance in order to promote the growth of bone tissue and have a biocompatible implant.

Conclusion
